D40 | Nikon

Choosing a shutter speed one step slower than the current shutter speed (for example, by changing shutter speed from 1/125 s to 1/60 s) is referred to as “slowing shutter speed by one step” and doubles the amount of time the shutter is open. If you are using a Nikon DSLR Camera, shutter speed changes in 1/3 steps; some models also support ...

Nikon | Imaging Products | DSLR Camera Basics | Shutter Speed

Available shutter speeds range from 30 seconds to 1/4000 second except when flash is enabled. When you use flash, the top shutter speed is 1/200 second; minimum shutter speeds vary depending on the exposure mode. This limitation is due to the way the camera must time the flash with the opening of the shutter.

How to Adjust Aperture and Shutter Speed on Your Nikon ...

It shoots at ISO 200 in good light, and at 1/15 of a second (or any speed you choose) it starts ramping up the ISO to a maximum of 1,600 (or any ISO you choose) as it gets darker. Only if it gets still darker will it let the shutter speed go below 1/15 at ISO 1,600, exactly as I'd do manually.
