animals in Math Cats' Tessellation Town!

Tessellations are patterns made from repeated designs that cover an area leaving no gaps between them. Tessellations are often used to teach symmetry, geometry and other lessons to children in grades 3-7. Possibly because of the age bracket, animals are among the most common nongeometric subjects to tessellate.

Patterns in nature are visible regularities of form found in the natural world. These patterns recur in different contexts and can sometimes be modelled mathematically. Natural patterns include symmetries, trees, spirals, meanders, waves, foams, tessellations, cracks and stripes. Early Greek philosophers studied pattern, with Plato, Pythagoras and Empedocles attempting to explain order in nature.

How to make a Tessellation - step by step tutorial - YouTube

Animals with irregular backs, like camels, or necks, like giraffes, may be easier to tessellate. Another solution is to use mammals that are curled up or resting, providing smoother edges to work with. In a pinch you can interweave the legs of two rows of mammals by turning one row upside down.

Animal Tessellation Ideas | Our Pastimes

The artist M. C. Escher is famous for making tessellations with irregular interlocking tiles, shaped like animals and other natural objects. If suitable contrasting colours are chosen for the tiles of differing shape, striking patterns are formed, and these can be used to decorate physical surfaces such as church floors.
