Rachel Botsman The currency of the new economy is trust There's been an explosion of collaborative consumption — web-powered sharing of cars, apartments, skills. Rachel Botsman explores the currency that makes systems like Airbnb and Taskrabbit work: trust, influence, and what she calls "reputation capital."

### The economy of trust | TED Talks

The rebuilding of trust in transition to a zero-carbon economy is perhaps the central political challenge facing the UK as it decarbonises. Increased climate ambition is just one of the forces set to reshape UK industry, whether driven by increased policy action at home or as markets are reshaped by the leadership of others.

### Trust in transition | New Economics Foundation

Trust capital: Trust is like a pot of money. When we do something for other people, we put money in the pot. When they do things for us, they take money out of the pot. The problem is that when we act in an untrustworthy manner, we are fined a huge amount and we can even become bankrupt.

### Rachel Botsman: The currency of the new economy is trust ...

The economic applications of the notions of trust and reputation are nu-merous. For example, oligopoly competitors might trust each other regarding an implicit or explicit price fixing agreement; a developing country would 3

### The Economics of Trust and Reputation: A Primer

We review contemporary theories of trust from behavioral economics and social psychology. Neoclassical economic theory considers trust in strangers to be irrational, but observed behavior reveals widespread trust and trustworthiness. Theories of social preferences and adherence to social norms have been proposed to rationalize trust.

### The Psychology (and Economics) of Trust

Economists distinguish between the personal, informal trust that comes from being friendly with your neighbors and the impersonal, institutionalized trust that lets you give your credit card number...

### The Economics Of Trust

The Economics Of Trust: Liberating Profits And Restoring Corporate Vitality. by. John O. Whitney. 4.50 · Rating details · 4 ratings · 1 review. Drawing on first-hand experience with companies on the brink, the director of the W. Edwards Deming Center for Quality Management shows that unless companies dismantle their mistrust-breeding hierarchies--and revamp the way they recognize, measure, and reward performance--they'll remain so inwardly focused on procedures and protocols that they can ...
